

## Hula Hoop Draw

Step 1: Take a hula hoop (a long piece of string tied in a loop works too) outside and place it anywhere on the ground.

Step 2: Look at the circle quickly and jot down what you see.

Step 3: Get closer (on your hands and knees) and see what else you notice. Is it really just grass, or are there lots of different kinds of plants? Are there bugs? Seeds? Fallen leaves? What kinds? Use the circle below to draw and make notes about what you see in the hoop.
